Edging & Cutting Service...

CNC Machine (Computer Numerical Control).

To enhance our service we have invested in the latest technology, our CNC machine performs a vast number of operations such as; Drilling, Vertical Milling and Engraving.

We can reproduce any shape accurately as it duplicates any item produce in our CAD software, in much less time and with more precision than someone working by hand.

Our CNC machine also compliments our edge banding machine that is used to cover the exposed sides of the materials such as plywood, particle board or MDF, giving the appearance of a solid (or more valuable) material.
